SUMMARY

As a software developer specializing in internet technologies, I am passionate about creating innovative and user-centric solutions that leverage the full potential of the internet. I enjoy collaborating with cross-functional teams, staying adaptable to changing requirements, and continuously expanding my skill set to deliver high quality software solutions that meet and exceed client expectations.

EXPERIENCE

Backend Developer

Sharp Detail Washington DC

📅 Date period　📍 Location

Company Description

- I served as a Backend Developer, responsible for testing code for errors and ensuring the overall quality of the datalayer and processes.
  I assisted in the development and implementation of backend systems and APIs to facilitate seamless integration.

Github Manager

Dexterer

📅 Date period　📍 Location

Company Description

- One of my primary responsibilities was organizing the GitHub repository effectively. I worked closely with the development team to establish a clear folder structure, create branches, and manage pull requests. I facilitated seamless collaboration and streamlined the development workflow. This allowed team members to work concurrently on different features, merge changes efficiently, and maintain a well-structured codebase.

Frontend Developer

Hallmarts

📅 Date period　📍 Location

Company Description

- I worked closely with the design team to ensure that the visual elements were accurately implemented, paying attention to details such as layout, typography, color schemes, and responsive design. By closely following design guidelines and best practices, I was able to create visually appealing and intuitive interfaces that enhanced the user experience.
  - In addition to design implementation, I utilized APIs provided by the backend team to integrate dynamic functionality into the frontend. This involved making HTTP requests, handling responses, and efficiently displaying data to users
